SUMMARY

Motivated Aspiring Information Technology professional with a strong foundation in front-end development, information security/cybersecurity, project management, and modern collaboration tools. Skilled in leveraging emerging technologies to design efficient and user-focused applications. Recognized as a quick learner and dependable team player with strong problem-solving abilities, eager to contribute technical expertise and innovative solutions in professional settings.

WORK EXPERIENCE

OkieDoc+ (Start-Up)	Jan 2026 - Present
Mobile Application Developer & UI UX (Voluntary Intern)	
• Currently developing the frontend of the mobile version. • Conducted weekly sprint planning and daily stand-up meetings to track project progress, discuss updates, and address development blockers. • Collaborated with the development team during Agile sprint cycles to ensure timely completion of assigned tasks. • Transformed the UI of the web into mobile. • Redesigned the old UI into a refined version.	
Bald Puppies Solutions Inc.	Jan - April 2026
Mobile Application Developer & UI UX (Internship)	
• Designed mobile application UI/UX for multiple client projects based on business requirements. • Developed the designed interfaces using React Native for mobile applications and Next.js for web platforms. • Managed source code and version control using Git and repositories hosted on Bitbucket. • Utilized Odoo for project management, task tracking, and workflow organization. • Implemented state management using Zustand to manage application data efficiently. • Applied form validation and schema validation using Zod to ensure reliable user input handling. • Participated in daily stand-up meetings to discuss progress, updates, and blockers in ongoing projects. • Collaborated with developers and supervisors to refine UI designs and improve application functionality. • Learned and integrated AI-assisted tools into development workflows to improve productivity and efficiency.	

Beepney: Enhancing Commuter Experience & Safety for Public Transportation Through Mobile Platform

June 2025

Senior Capstone Project

- Developed a responsive web and mobile application called Beepney, which aims to enhance the commuter experience by providing quality services for both commuters and drivers of public transportation.
- Utilized frameworks such as React Native and Expo Go for mobile development, and Next.js for web development.
- Jira for project management.
- **Additional:** Features of our application are **cashless fare payment, view specific locations of public transportation terminals through map** (it includes the number of available different types of public vehicles, the start and end time of the operation, and its destination), **fare calculator, ride-hailing for tricycle drivers, sos call, report, and file a complaint, etc.**

School and Personal Projects

- | | |
|--|------------------------|
| • IP Look-App: Developed an IP lookup application where users can search IP addresses and outputs the geolocation information such as the user's city region, country, postal code, time zone, coordinates, and Internet Service Provider (ISP). <ul style="list-style-type: none">◦ Tools used: React Native, TypeScript, IPInfo API, CSS, Node.js, Supabase | December 2025 |
| • ADDNOUNCE: A react native application where student organizations and student government can post announcements, events, and university's related events in Ateneo de Naga Univeristy. <ul style="list-style-type: none">◦ Tools used: React Native, TypeScript, NativeWind (Tailwind). | Feb - May 2025 |
| • BDLE: A web app classroom attendance management system in our course (Integrative Programming 2) during 3rd year. There are 2 entities - instructor and students, where instructors will set a random class code and post a question of the day to determine that the students attended the class. <ul style="list-style-type: none">◦ Tools used: React, Express, Node.js, CSS, Firebase, MongoDB, Render | Sept - Dec 2024 |

EDUCATION

Bachelor of Science in Information Technology
Ateneo de Naga University

2022 (Present)

TECHNICAL SKILLS

- **Front-end & Web & Mobile Frameworks:** HTML, CSS3, JavaScript, TypeScript, React.js, React Native, Next.js.
- **Back-end (AVERAGE EXPERIENCE):** Node.js, Supabase (BaaS), RESTful API.
- **Database:** Supabase, Firebase, MongoDB, PostgreSQL
- **Deployment:** Vercel
- **Other Programming Language:** C++.
- **State Management:** Zustand.
- **Mobile Development Tools:** React Native, Expo Go.
- **UI/UX Tools & Modeling Tools:** Figma, Draw.io, Jira (Gantt Chart) and Lucid Chart.
- **Project Management:** Jira.
- **Version Control:** GitHub, Bibucket.
- **3rd Party APIs:** MapBox & InfoIP.
- **Vulnerability Scanning Tool:** NMAP.
- **Linux Distributions:** Ubuntu, Kali Linux, & Alma Linux.
- **CyberSec. & System Administration Skills:** Bash Scripting, Monit (Open-source monitoring tool), Security Policy making.
- **AI Tools:** Cursor, ChatGPT, Claude Code, Anti-Gravity.

SOFT SKILLS

- Problem solving & Critical Thinking Skills
- Communication (Strong written and basic verbal communication skills)
- Adaptability & Flexibility
- Management Skills
